

ZZEN

ANXIOUS AND «HOT» HORSES

Description

Some horses are more sensitive than others to stress caused by training, competitions, transportation and changes of environment. These new situations may require additional nutritional support.

Purpose

ZZEN has been formulated by AUDEVARD Laboratories to provide additional nutritional support for horses suffering from excessive stress and nervousness, without affecting their sporting performance.

Formula

The new ZZEN formula has been reinforced with tryptophan and vitamin B6, and still contains high concentrations of magnesium and vitamin B1, which nervous horses consume in greater amounts. The formula is completed with bacopa.

Daily allowance

50 ml per day for 2 to 4 weeks, preferably at the start of the day. Shake well before use. Give ZZEN directly into the mouth or mixed in with feed.

Professional format

1 L bottle - (EAN 3515657978352). Sufficient for 20 days' use.

BEHAVIOUR

Composition per Litre

Additives:

- **2b Aromatic substances:** Bacopa (*Bacopa monniera* - mother tincture) 136 800 mg, Ethanol (CAS No. 64-17-5) 40000 mg, Stevia extract (CoE 552) 3000 mg.
